

Honeypot

Your security team has set up a honeypot to catch hackers. If one of your clusters is going to be destroyed, destroy the honeypot instead.

OPEN SOURCE

PromCat.io

You use the Prometheus exporters in PromCat.io to improve your observability with Prometheus. Discard effects no longer affect you.

CORPORATION

Melon Usk

A billionaire buys the cloud, and has creative ways of reducing costs. Destroy all microservices.

OPEN SOURCE

DATABASE

PostgreSQL

You add sharding and replication to your db. Once per turn, you may discard your hand. Shuffle the discard pile back into the deck. Draw back the number of cards you discarded.

MICROSERVICE

JAVA

SpringBoot

You start converting your legacy application to modern frameworks. At the start of your turn, you may pick one card from the discard pile. If you do so, skip your drawing step.

OPEN SOURCE

Terraform

You define all your infrastructure through terraform scripts. Once per turn, you may discard a card. If you do so, draw a card.

Sysdig Monitor

Your clusters are monitored by Sysdig Monitor. At the start of your turn, another player of your choice reveals a cluster.

OPEN SOURCE

Helm Deployments

You use Helm to automate your deployments. You might play an additional attack per turn.
